

# Metered Dose Nasal Spray

#### COMPOSITION

**Solospray<sup>™</sup>** Nasal Spray: Each metered dose spray delivers Sodium Chloride BP 900 mcg.

# PHARMACOLOGY

Sodium Chloride 0.9% Nasal Spray moistens inside the nose by dissolving and softening thick or crusty mucus thus helps to remove the mucus from the nose and makes breathing easier.

Excess Sodium is predominantly excreted by the kidneys with small amount lost in faeces and sweat.

In babies and young children with stuffy noses who cannot blow their noses, using this product helps to make the mucus easier to remove with a nasal bulb syringe. This helps relieve stuffiness and makes breathing easier.

#### INDICATION

**Solospray**<sup>™</sup> Nasal Spray is used to treat nasal congestion associated with:

- Colds and sinusitis
- Allergic rhinitis
- Post-operative nasal care

It is also used to treat dryness inside the nose (nasal passages). It is designed to help moisten the nasal cavities and gently wash away excess mucus including germs, allergens or irritants breathed in through the nose. **Solospray**<sup>™</sup> Nasal Spray is an isotonic (also called saline) solution.

#### **DOSAGE & ADMINISTRATION**

Newborn to 12 months-1 spray into each nostril for 2-3 times or as directed by the physician.

Children over 12 months & Adults-1 to 2 sprays into each nostril for 2-3 times or as directed by the physician.

# PRECAUTIONS

Precaution should be taken in patients who are allergic to Sodium Chloride.
