Vitamin B <sub>12</sub>	6.25 mcg
D-Panthenol	1.25 mg
Niacinamide	37.5 mg
DL-Methionine	5.0 mg
L-Lysine	5.0 mg
Choline Chloride	5.0 mg
Excipients	Q.S.

## Highlighting points:

Vitamin B<sub>1</sub> is one of the most essential elements of metabolism and multiplication of *Eimeria* spp, responsible for coccidiosis in poultry. Without B<sub>1</sub>, *Eimeria* spp cannot survive. So, it is advised to stop vitamin B-complex preparation as it contains vitamin B<sub>1</sub> during coccidiosis in poultry. But, at the same time other B vitamins play a great role in red blood cell (RBC) production, metabolism and other physiological activities in poultry. So, it is not wise to stop B-Vitamins only for vitamin B<sub>1</sub>.

B-Com Vit Liquid is such a preparation where vitamin B<sub>1</sub> is absent. As a result B-Com Vit Liquid can be used in poultry at any time regardless the occurrence of coccidiosis.

## Purpose:

A vitamin preparation to birds for better performance.

## Dosage:

Broilers: 1 ml in 2-5 liter of drinking water for 3-5 days.
