

De-rash

Zinc Oxide BP

Composition:

De-rash® Ointment: Each gram ointment contains 400 mg Zinc Oxide BP.

Pharmacology:

Zinc oxide is used to treat or prevent minor skin irritations such as burns, cuts, poison ivy, poison oak, poison sumac, and diaper rash. It is also used as a sunscreen.

Indication:

De-rash® (Zinc Oxide) helps treat and prevent diaper rash while it moisturizes and nourishes the skin. The zinc oxide based formulation provides a protective barrier on the skin against the natural causes of irritation. **De-rash**®

(Zinc Oxide) spreads on smooth and wipes off the baby easily, without causing irritation to the affected area.

Dosage and Administration:

Change wet and soiled diapers promptly, cleanse the diaper area, and allow drying.

Apply ointment liberally as often as necessary, with each diaper change, especially at

bedtime or anytime when exposure to wet diapers may be prolonged.

Side Effect:

Not known

Contraindication and precaution:

For external use only.

When using this product avoid contact with eyes

Stop use and ask a doctor if condition worsens or does not improve within 7 days. This

may be a sign of a serious condition.

Keep out of reach of children. If swallowed, get medical help immediately.

Drug interaction:

No hazardous drug interactions have been reported.

Storage condition:

Keep out of the reach of children. Do not freeze. Keep at cool and dry place.

How supplied:

De-rash® Ointment: Each pack has a tube containing 25gm of the ointment.
