

# Emolent<sup>TM</sup> Plus

Light Liquid Paraffin, White Soft Paraffin & Glycerine

## COMPOSITION

**Emolent<sup>TM</sup> Plus** Cream: Each gram Cream contains Light Liquid Paraffin BP 100 mg, White Soft Paraffin BP 50 mg and Glycerine BP 100 mg.

## PHARMACOLOGY

Glycerine is an exceptionally good moisturizing, emollient and protective agent. Its ability to capture and retain water slows down the evaporation of water from the surface of the skin. It is also a humectant (wetting agent), which promotes hydration of the skin.

Light Liquid Paraffin and White Soft Paraffin exert an emollient effect by forming an occlusive film which reduces trans-epidermal water loss, thus helping to maintain normal skin humidity levels.

## INDICATION

**Emolent<sup>TM</sup> Plus** Cream is a highly concentrated moisturizing Cream that is indicated to-

- Prevent and relieve dry skin
- Manage dry skin problems associated with eczema, dermatitis and psoriasis

## DOSAGE & ADMINISTRATION

Combination of Light Liquid Paraffin, White Soft Paraffin & Glycerine Cream is to be used as 'on demand' basis when required. Apply to the affected area and rub in well. It is especially effective after bathing, showering, and exposure to harsh climatic conditions and at night.

## USE IN PREGNANCY AND LACTATION

There are no restrictions on the use during pregnancy or lactation.

## USE IN PEDIATRIC PATIENTS

Suitable for infants and children.

## USE IN GERIATRIC PATIENTS

Suitable for the elderly.
