

# Nasovap<sup>TM</sup>

Menthol USP 2% w/v & Eucalyptus Oil BP 10% v/v

Suspension  
for **inhalation**  
100 ml

## COMPOSITION

Each ml contains Menthol USP 20 mg and Eucalyptus Oil BP 0.10 ml.

## PHARMACOLOGY

Menthol and Eucalyptus oil are decongestants and help to ease breathing difficulties.

## INDICATION

For relief of the symptoms of coughs, colds and blocked noses.

## DOSAGE GUIDELINE

Adults, the elderly & children over 3 months:  
Add

5 ml spoonful of suspension to 500-600 ml of hot, but not boiling water. Inhale the steamy vapour through the mouth and nose. Repeat after 4 hours if required. Shake well before use. For external use only.

## CONTRAINDICATION

Not suitable for children under 3 months. Hypersensitivity to Menthol, Eucalyptus or any of the other ingredients.

## SIDE EFFECT

Hypersensitivity reactions including allergic rhinitis, itching, swelling & contact dermatitis. There have been reports of apnea and instant collapse in infants following the local application of menthol to their nostrils.

## USE IN PREGNANCY & LACTATION

Menthol & Eucalyptus oil inhalation during pregnancy & lactation is unlikely to have any ill effects when used as directed.

## HOW SUPPLIED

Each bottle contains 100 ml suspension for inhalation with 10 ml measuring cup.
