

# **Toxol<sup>®</sup> Liquid**

Liver Protector & Stimulator

## **Composition:**

Choline, Methionine, Inositol, Vitamin B<sub>12</sub> in a base fortified with predigested protein, Aminonitrogen (Lipoacceptor Protein) and Liver extract.

## **Indications:**

Protects liver from adverse effects of toxins. Keeps liver clear, healthy & active. Improves nutrient utilization. Enhances liver function for better production.

## **Benefits of Toxol<sup>®</sup> Liquid:**

- Toxol composed of lipotropic factors and a lipoacceptor protein (Aminonitrogen) provides the most comprehensive liver care during general and specific problems of liver.
- Lipoacceptor protein makes gut stable, helps to move excess accumulated fat in hepatocytes, making hepatocytes more active.
- Toxol can prevent liver insufficiency due to exogenous and endogenous toxins and stressors.
- During stress, Toxol supplementation can help the bird to overcome the adverse effects on liver and come back early to normal productivity and FCR.

## **Dosage & Administration:**

Broiler (As a liver tonic): 5 ml per 100 birds for 15-20 days.

Layer (Treatment): 15-20 ml per 100 birds for 3-5 days.

Fatty Liver Syndrome (Prevention): 15-20 ml per 100 birds for 3-5 days. Then 5 ml per 100 birds regularly or as directed by the Registered Veterinary Doctor.

## **Pack Size:**

100 ml & 1 Liter plastic bottle.
